THE KENYA NATIONAL EXAMINATIONS COUNCIL

THE KJSEA SCHOOL SPECIFIC REPORT

Introduction: User Guide

The Kenya National Examinations Council (KNEC) has prepared School Specific Reports (SSR) on the Kenya Junior School Education Assessment (KJSEA) performance for school-level stakeholders. The target group of these reports includes teachers of various subjects, heads of institutions and other authorized educational stakeholders.

This guide is a supporting document to the Kenya Junior School Education Assessment (KJSEA) School Specific report. It explains how to interpret your school's results, provides examples of analysis, and suggests practical actions that schools can take to improve teaching and learning.

The guide is organised in two sections:

Section 1: Interpreting the Results – explains how to read the report, including an overview of the competency levels and the four levels of analysis.
Section 2: Using the Results to Improve Teaching and Learning – provides a simple, step-by-step process for turning results into practical actions at the school and classroom level.

How to Use This Guide

Review Section 1

1. **Review Level i)** to identify subjects where learners perform strongest and weakest.
2. **Review Level ii)** to understand how learners perform across different cognitive skills.
3. **Review Level iii)** to identify how learners perform specific tasks in each subject.
4. **Review Level iv)** to see common learner errors and suggested teaching strategies.

Review Section 2 for a step-by-step process for improving teaching and learning based on the results.

KJSEA results are most useful when schools discuss them collectively and use them to reflect on teaching practices and learner support.

Section 1: Interpreting the Results

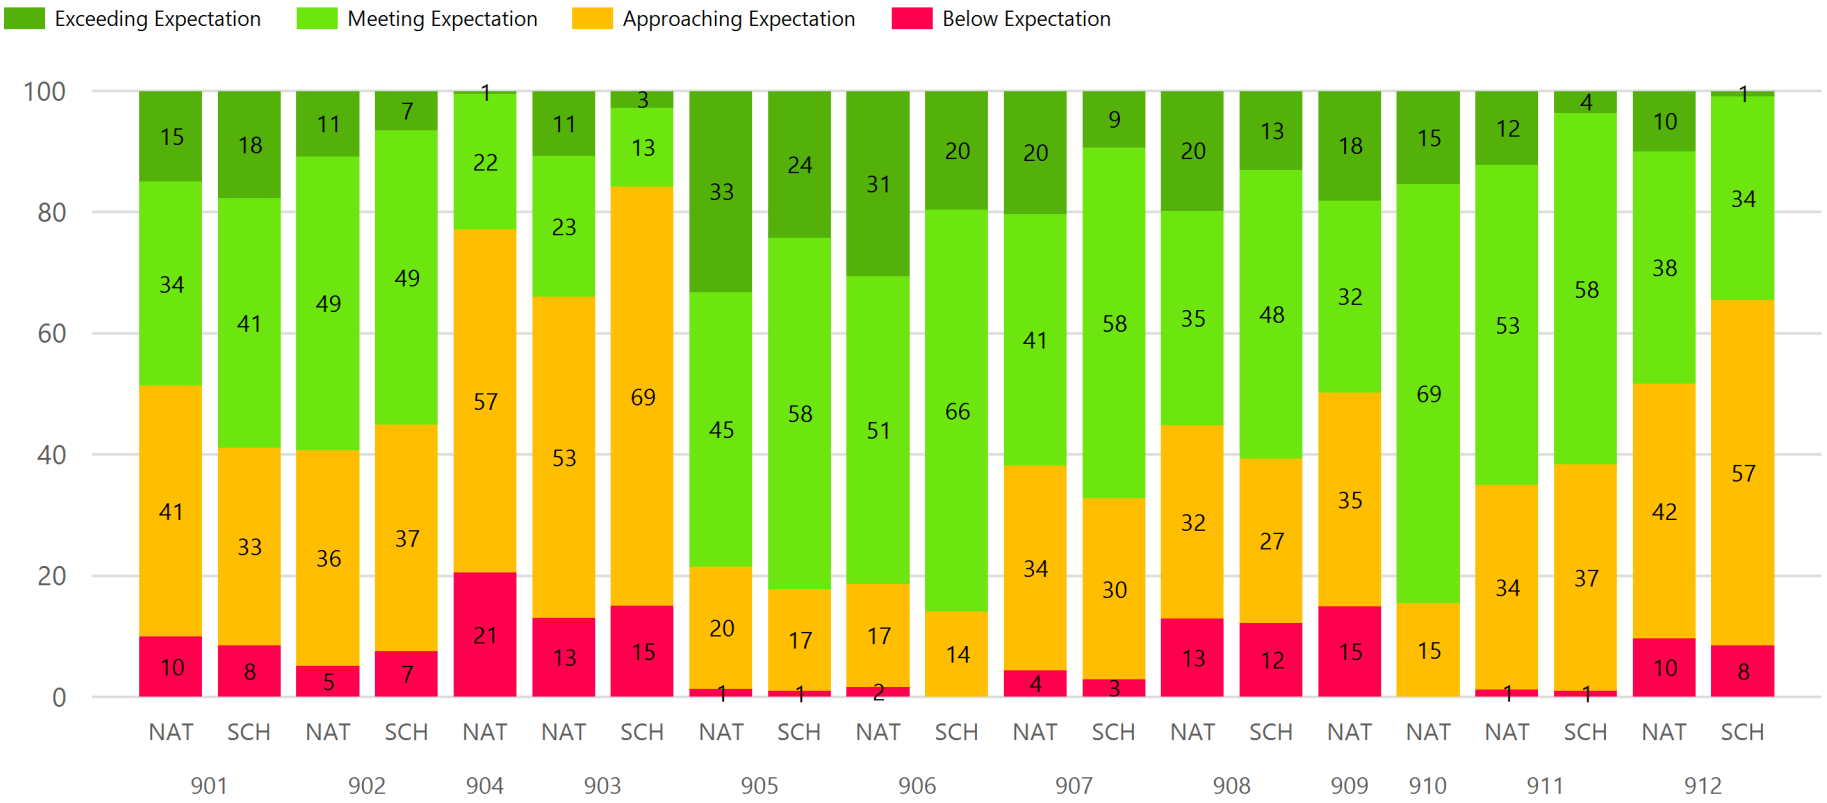

Level i: School Performance by Subject

Level i shows the the distribution of learners across four competency performance levels—*exceeding expectations, meeting expectations, approaching expectations, and below expectation*s—compared with the national benchmark. The national benchmark is the defined level of expected competency that each learner is supposed to achieve at the end of a grade.

Table 1- Distribution of Learners Across Performance Levels by Subject: School and National Benchmark

Level	Category	901	902	904	903	905	906	907	908	909	910	911	912
Exceeding Expectation	National	15%	11%	1%	11%	33%	31%	20%	20%	18%	15%	12%	10%
	School	18%	7%		3%	24%	20%	9%	13%			4%	1%
Meeting Expectation	National	34%	49%	22%	23%	45%	51%	41%	35%	32%	69%	53%	38%
	School	41%	49%		13%	58%	66%	58%	48%			58%	34%
Approaching Expectation	National	41%	36%	57%	53%	20%	17%	34%	32%	35%	15%	34%	42%
	School	33%	37%		69%	17%	14%	30%	27%			37%	57%
Below Expectation	National	10%	5%	21%	13%	1%	2%	4%	13%	15%		1%	10%
	School	8%	7%		15%	1%		3%	12%			1%	8%

Figure 1: Distribution of Learners Across Performance Levels by Subject: School and National Comparison(%)

Questions for Reflection
When reviewing Level i results, consider the following questions:

- Which subjects show the strongest performance?
- Which subjects show the weakest performance?
- How large are the gaps compared with the national benchmark?
- Which gaps should the school prioritise?
- What factors might explain stronger or weaker performance?
- Based on these results, what short-term, actionable interventions can be implemented?

Level ii: School Performance by Cognitive Skills

Level ii examines learner performance across different types of cognitive skills, based on the Revised Bloom's Taxonomy.

These skills range from lower-order skills, such as *remembering* and *understanding* information, to higher-order skills, such as *applying* knowledge, *analysing* information, *evaluating* evidence and *creating* responses.

The table compares the school's average score in each cognitive skill in each subject, with the national average.

How to Read Table 2:
- Read the rows for each subject, to understand see how learners perform across different skill areas.
- Compare the school score (SCH) with the national benchmark (NAT).
- Review the difference (DIF) to understand how far the school is above or below the national average.
    - Green values indicate that the school performed at or above the national average.
    - Red values indicate that the school performed below the national average.

PERFORMANCE ON COGNITIVE SKILLS BY SUBJECT (%)

*****KEY: NAT - National, SCH- School, DIF - Difference between school and national average *****

Questions for Reflection
When reviewing Level ii results, consider the following questions:
• In which cognitive skills are learners performing best?
• In which cognitive skills are learners performing worst?
• How large are the gaps compared with the national benchmark?
• Are the school's strengths and weaknesses consistent across subjects, or are they subject-specific?
• Are the low performed subjects targeted for remediation and other interventions to improve performance?
• Are lower-order skills sufficiently mastered, or are there foundational gaps that need to be addressed?
• Which gaps are most important for the school to address?
• What factors might explain stronger or weaker performance?
• Based on these results, what short-term, actionable interventions can be implemented?

Level iii: Performance by Subject Content Area

Level iii examines learner performance within specific content areas of each subject (for example, grammar, reading comprehension, algebra etc.).
• **Green** values indicate that the school performed at or above the national benchmark
• **Red** values indicate that the school performed below the national benchmark.

Table 3: ANALYSIS OF CONTENT AREA BY SUBJECT FOR ENGLISH (LANGUAGE)

912/1	3.35	3.54	-0.19	3.14	2.96	0.18	7.56	7.56	

Questions for Reflection

When reviewing Level iii results, consider the following questions:

- In which content areas are learners performing best?
- In which content areas are learners performing worst?
- How large are the gaps compared with the national averages?
- Which gaps are most important for the schools and relevant subject teachers to address?
- What factors might explain stronger or weaker performance?
- Based on these results, what short-term, actionable interventions can be implemented?

Example interpretation:

In our example there is substantial variation in mathematics performance across content strands. Compared to national benchmarks and the school underperforms in every strand, though the size of the gap varies, with the widest gap in data handling and the lowest in numbers. These patterns point to the need for targeted instructional support, particularly in higher-demand strands.

Level iv: Item-Level Analysis and Teaching Guidance

Level iv analysis provides item-level analysis for each subject.

- The section identifies:
  - Common learners' errors in specific assessment questions
  - The skills and cognitive level being tested
  - Suggested teaching strategies to address these difficulties.

Teachers can use this information to identify specific learning difficulties; reflect on their teaching approaches; adjust classroom instruction to strengthen learner understanding.

In addition, the table includes an indicator to help interpret how learners responded to each question:
The **F Index (Facility Index)** shows the proportion of learners who correctly responded to the item. Values range from 0 to 1, where higher values indicate that more learners correctly responded to the item and lower values indicate that the learners faced difficulty in providing the correct response to the item.

This index helps identify which questions were most challenging for learners and which items are most useful for assessing differences in learner understanding.

Questions for Reflection

When reviewing Level iv results, consider the following questions:

- What are the common errors in the subject I teach?
- How am I currently teaching these skills?
- How can the suggested strategies be incorporated into my teaching practice?

Tip for teachers: Focus first on the errors that affect many learners. These often indicate areas where additional teaching support is needed.

MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
1.	Numbers	Ability to classify numbers as prime or composite	Remembering	Learners inability to distinguish between prime and composite numbers often misclassifying numbers such as 4 and 9 as prime	Teachers to emphasize the meaning of prime numbers using factor trees; use concrete grouping activities; provide practice distinguishing prime versus composite numbers.	
2.	Numbers	Forming equal groups using given quantities (GCD)	Applying	Learners failure to find factors that give equal grouping	Teachers to use real-life grouping scenarios; teach step-by-step factorization; contrast GCD vs LCM clearly; provide guided exercises on forming equal groups using GCD.	
3.	Numbers	Interpretating temperature changes involving negative integers	Applying	Learners inability to interpret "increase" when dealing with negative numbers	Teachers to use number lines real-life contexts explicit vocabulary when teaching and guided practice to strengthen learners' mastery of operations on integers	
4.	Numbers	Ability interpret a real-life time allocation situation to determine the extra time used by comparing planned time and actual time per task.	Analyzing	Learners failure to interpret the meaning of 'extra time' confusing subtraction with multiplication comparing fractions incorrectly before scaling to total quantities.	Teach learners to first find the difference between fractions step-by-step using common denominators. Then guide learners to multiply by the total number of items. Provide structured practice with similar multi-step problems.	
5.	Numbers	Ability to solve exponential equations by simplifying indices and expressing numbers in the same base to find unknown values.	Applying	Learners failure to relate the laws of indices in real life situations.	Teachers should emphasize comparison before computation to reduce errors resulting from operations done without understanding the concept	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
6.	Algebra	Translating a real-life situation into an algebraic expression to determine the number of remaining items.	Analyzing	Learners inability to construct the correct algebraic expression.	Teachers to stress more on conceptual understanding of variables practice in translating words to algebra	
7.	Algebra	Ability to interpret a real-life situation and represent it using inequalities that show a valid range of values.	Applying	Learners inability to interpret and apply inequality symbols correctly	Teachers should use step-by-step demonstrations and visual tools that can help clarify inequalities symbols.	
8.	Algebra	Interpreting tabular data presented in matrix form and correctly determining the order (rows by columns) of the matrix.	understanding	Learners failure to recognize the order i.e columns × rows instead of rows × columns	Teachers to emphasize "rows × columns" using visual models real-life contexts and structured practice to improve mastery.	
9.	Measurements	Applying knowledge of arc length to determine the distance swept by a rotating object (door) using angle and radius.	applying	Learners failure to comprehend the required length	Teachers to emphasize conceptual understanding of measurement by using real-life objects and demonstrations	
10.	Measurements	Calculating surface area of a cylindrical object in contact with water using given dimensions.	Analyzing	Learners failure to apply formulas correctly and confusion related concepts	Teachers to use more real models from the environment in teaching surface area of solids/ shapes to emphasize formular interpretation	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
11.	Measurements	Determining the capacity of a cuboid-shaped object and expressing the result in litres.	Applying	Difficulties in converting cubic units to litres	Teachers to embrace strengthening the conceptual link between volume and capacity; emphasize capacity as a practical application of volume while teaching	
12.	Measurements	Converting temperature from Kelvin to degrees Celsius by applying the correct formula and interpreting negative values correctly.	Applying	Confusion in conversion rule incorrectly applying multiplication/division instead of subtracting 273	Teachers should emphasize the formula °C = K − 273 using practical examples ; provide simple drills on temperature conversion; link to real-life contexts such as weather temperatures.	
13.	Measurements	Learners ability to interpret a mobile money tariff table and solve a multi-step transaction problem involving sending and withdrawal charges.	Analyzing	Learners failure to interpret tariff tables correctly omitting transaction charges or performing incorrect sequential subtraction; weak multi-step reasoning skills.	Teachers should teach step-by-step breakdown of transactions; model how to read tables accurately; use real-life mobile money simulations; give practice on sequential operations and checking intermediate results.	
14.	Measurements	Determining the percentage error by correctly identifying the actual value and applying the appropriate formula.	Applying	Confusing formula for percentage error and used wrong denominator (estimated vs actual value); difficulty identifying correct reference value.	Teachers to reinforce formula: Percentage error = (Error ÷ Actual value) × 100; use concrete measurement activities; compare estimated vs actual values physically; provide worked examples before independent practice	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
15.	Geometry	Analyzing properties of quadrilaterals to correctly identify the specific shape based on given characteristics.	Analyzing	Learners failure to link combined properties (equal sides parallel sides perpendicular diagonals) to a specific quadrilateral; confusion between parallelogram rectangle and rhombus.	Teachers to use property comparison charts; engage learners in sorting/classifying shapes; use diagrams showing diagonals; emphasize unique properties of rhombus through practical drawing and measurement activities.	
16.	Geometry	Ability to apply scale in determine actual and drawing lengths by converting between units correctly.	Applying	Misinterpretation of scale 1:100 and failure to convert metres to centimetres; weak understanding of proportional reasoning	Teachers to teach stepwise conversion (m to cm first); use real-life drawings (maps plans); provide guided examples on scaling up and down; reinforce ratio interpretation using practical tasks.	
17.	Geometry	Determining the gradient of a line perpendicular to a given line by manipulating equations into slope form.	Understanding	Failure to determine negative reciprocal of gradient; errors in rearranging equation to $y = mx + c$ form.	Teachers to reinforce concept of gradient from slope; teach relationship $m_1 \times m_2 = -1$; practise converting equations to slope form; use graphical demonstrations of perpendicular lines	
18.	Geometry	Learners ability to apply scale factor to determine the new size of an object after enlargement.	Applying	Although majority answered correctly a notable group confused enlargement with addition instead of multiplication or misinterpreted "twice" as adding once rather than doubling	Teachers to reinforce meaning of scale factors using real-life examples (photos drawings); emphasize that "twice" means multiply by 2; provide quick drills on enlargement and reduction; use visual demonstrations showing before-and-after scaling.	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
19.	Geometry	Measuring an angle accurately using a protractor from a given diagram.	Understanding	Learners inability to use the protractor accurately reading the wrong scale (either inner or outer) or failure to align the baseline correctly leading to inaccurate angle readings.	Teachers to provide guided practical activities on correct protractor use; demonstrate alignment of centre and baseline; allow repeated hands-on measurements; use peer verification and real-life objects for angle estimation.	
20.	Data Handling & Probability	Determining the probability by identifying total outcomes and favourable outcomes from a set of repeated elements.	Understanding	Learners failure to determine total number of letters and correctly identify favourable outcomes when letters repeat; confusion between frequency and probability.	Teachers to use concrete materials like letter cards; guide learners to list and count all outcomes systematically; emphasize probability = favourable/total; practise with words containing repeated letters	
21.	Numbers	Learners ability to interpret a real-life scenario involving a 10 000 m race by determining the remaining distance walked representing the distance in words and rounding it appropriately.	Analyzing	Learners inability to carry out subtraction involving large numbers incorrect place value interpretation difficulty expressing numbers in words and errors in rounding to required place value.	Teachers to use real-life contexts (e.g. races journeys) to teach subtraction; reinforce place value using charts; provide guided practice on writing numbers in words; teach rounding using number lines and practical examples.	
22.	Numbers	Learner's ability to apply knowledge of volume of cubes and unit conversion in solving real-life measurement and packing problems.	Analyzing	Learners confused volume with surface area failed to cube dimensions correctly and difficulty converting units (m to cm); weak understanding of packaging concepts.	Teachers to use practical models of cubes; demonstrate volume calculation step-by-step; reinforce unit conversion through drills; use hands-on activities (packing cubes) to build spatial understanding.	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
23.	Numbers	Interpreting a real-life thanksgiving ceremony scenario involving ratios to determine the number of participants in each category and compare group sizes.	Applying	Learners failure to apply ratio concepts to real numbers failure to find the value per ratio part and errors in comparing quantities.	Teachers to use real-life grouping scenarios; teach stepwise ratio solving (total parts and unit value); use visual models like bar diagrams; provide practice in comparing quantities using subtraction.	
24.	Numbers	Analyzing work-rate scenario in a factory to determine how changes in number of workers and working hours affect the time taken to complete a task	Analyzing	Learners confusion of direct and inverse proportion failure to relate workers hours and days correctly.	Teachers to use teamwork simulations; teach relationships between work time and labour explicitly; use tables to model variation; provide guided stepwise problem-solving practice.	
25.	Numbers	Converting a recurring decimal into its equivalent fraction form in a real-life health data context.	Understanding	Failure recognise recurring decimals or applying incorrect conversion procedures; weak algebraic manipulation skills	Teachers to teach step-by-step method of converting recurring decimals using algebra; use pattern recognition activities; provide guided practice with different types of recurring decimals	
26.	Algebra	Analyzing a real-life shopping scenario to determine the individual cost of books and pens using simultaneous equations.	Analyzing	Learners failure to translate word problems into equations errors in elimination/substitution methods and confusing variables.	Teachers should use real-life contexts (shopping budgeting); teach step-by-step equation formation; model both substitution and elimination methods; provide guided practice with simple to complex problems.	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
27.	Algebra	Learners ability to interpret tabular data of fruits purchased by families to form matrices and determine total quantities of each fruit type for each family across the weeks.	Creating	Learners failure to organize data into matrices correctly confusing rows and columns and errors in matrix addition.	Teachers should use clear table-to-matrix mapping demonstrations; reinforce row-column structure; provide guided practice in matrix addition using familiar contexts; use visual representations and real-life data.	
28.	Algebra	Analyzing coordinate geometry scenario involving a parallelogram to determine the equation of a line and find its x-intercept using gradient and point information.	Analyzing	Learners inability to form equations from a point and gradient confused y = mx + c form and errors when finding intercepts (setting y = 0).	Teachers should teach step-by-step formation of equations using point-gradient form; reinforce slope interpretation; use graphical demonstrations; provide practice in identifying intercepts through substitution.	
29.	Measurements	Learners ability to investigate a real-life solid (cone) and calculate its total surface area using given dimensions.	Analyzing	Learners confusion of surface area with volume misinterpretation of the formulae and calculation errors especially with π and squaring.	Teachers should teach formula derivation and meaning of each part; use models of cones; guide learners through substitution steps; provide practice with correct use of π and rounding.	
30.	Measurements	Examining practical situation involving displacement of liquid in a cylinder when a spherical object is immersed to determine rise in water level.	Applying	Learners failure to relate displaced volume to rise in height and inability to rearrange the formulas.	Teachers to use experiments with water displacement; teach relationship between volume and height in cylinders; provide stepwise problem-solving; use visual diagrams to link concepts.	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
31.	Measurements	Analyzing real-life scenario involving leaning rod to determine its length using Pythagoras theorem and calculate its density from the given mass and volume.	Analyzing	Failure to identify right-angled triangle relationships wrong application of the Pythagorean formula and confusing density formula and units (mass/volume).	Teachers to reinforce use of Pythagoras using practical contexts (ladders rods); teach step-by-step substitution; use unit analysis for density; provide hands-on activities linking volume mass and density.	
32.	Measurements	Learners ability to interpret global positioning information to determine time differences between two towns based on their longitudes.	Applying	Confusion of east-west longitude differences failure to convert degrees to time (4 min per degree) and misinterpretation of time.	Teachers should teach relationship between longitude and time using globe models; practise east-west time calculations; use stepwise guided problems; reinforce 1° = 4 minutes rule with examples.	
33.	Measurements	Analyzing a real-life business scenario to calculate different types of taxes (import duty excise duty and VAT) based on given rates and values	Analyzing	Inability to identify the sequence of tax calculations using wrong percentage formula and arithmetic errors in multi-step calculations.	Teachers should teach step-by-step tax computation processes; use real-life contexts (shopping imports); reinforce percentage calculations; provide structured practice with multiple tax scenarios.	
34.	Geometry	Learners ability to use geometric construction skills to draw a parallelogram accurately using given measurements and construct a perpendicular line to determine a required distance.	Creating	Inaccuracy in constructing angles and lengths wrong use of compass and ruler and failure to construct perpendiculars correctly; weak understanding of construction procedures.	Teachers to provide step-by-step demonstrations of constructions; allow hands-on practice with compass and ruler; use guided tasks to construct basic shapes and perpendiculars; reinforce properties of parallelograms through drawings.	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
35.	Geometry	Interpreting real-life farming context to complete a table of values from a linear equation and draw its graph to represent the relationship between variables.	Applying	Wrong substitution of values omitting steps when completing tables and plotting points inaccurately and failure to use the correct scale on the axes.	Teachers should teach step-by-step substitution; use guided table completion; demonstrate correct graph plotting and scaling; provide real-life graphing tasks and peer checking.	
36.	Geometry	Analyzing a real-life scenario involving angle of depression to determine the height of a building using trigonometry.	Analyzing	Inability to identify angles of elevation and depression failure to form correct right triangle and using the wrong trigonometric ratios.	Teachers should use diagrams to link real-life context to triangles; reinforce identification of opposite/adjacent sides; teach correct use of tangent ratio; provide stepwise guided practice.	
37.	Geometry	Interpreting real-life navigation scenario using bearings to construct positions on a scaled diagram and determine distance and direction between points.	Creating	Failure to interpret bearings failure to use scale accurately constructing incorrect angles and inability to determinine distance and reverse bearing from diagrams.	Teachers should reinforce bearing concepts using compass directions; teach step-by-step scale drawing; provide hands-on activities with protractors; use guided practice on measuring distances and determining bearings from diagrams.	
38.	Geometry	Learners ability to use a real-life modelling scenario of a cuboid to draw its net and determine the total surface area from the constructed net	Applying	Learners failure to correctly unfold the cuboid misrepresenting faces in the net omitting some faces and errors in calculating surface area due to incorrect dimension use.	Teachers should teach step-by-step development of nets using physical models; allow learners to cut and fold paper models; reinforce identification of all faces; guide learners in calculating surface area using correct dimensions; provide practical exercises linking nets to real objects.	

Centre code:11205102 Centre Name: NGEGU						
MATHEMATICS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
39.	Data Hndling & Probability	Organizing marks into a frequency table and computing measures of central tendency	Creating	Learners inability to organize raw data into frequency tables computational errors when finding mean and median	Teachers should use real classroom data to teach organization into frequency tables; guide learners step-by-step in calculating mean and median	
40.	Data Hndling & Probability	Analyzing probability experiment involving a coin and a die to determine possible outcomes and specific event probabilities.	Analyzing	Learner failure to list complete sample spaces and identifying favourable outcomes correctly.	Teachers should use concrete experiments (coins and dice) to demonstrate sample space; provide repeated practice in identifying outcomes and calculating probabilities.	

Centre code:11205102 Centre Name: NGEGU						
INTEGRATED SCIENCE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
1.	Scientific Investigation	Identifying appropriate first aid for burns	Understanding	Confusing treatment of burns with cuts or chemical injuries	Practical demonstrations of first aid procedures	
2.	Scientific Investigation	Identifying measuring instruments and quantities	Remembering	Confusing physical quantities and instruments	More hands-on measurement activities	
3.	Mixtures elements and compounds	Relating properties of metals to uses	Understanding	Relating the properties of materials to their practical uses in everyday life.	Use real-life examples of utensils and materials	
4.	Mixtures elements and compounds	Identifying particles in an atomic nucleus	Remembering	Confusing electrons with nuclear particles	Use atomic models and diagrams	
5.	Mixtures elements and compounds	Identifying acids from observable properties	Understanding	Confusing acids bases and salts	Conduct simple acid-base investigations	
6.	Mixtures elements and compounds	Classification of substances (elements compounds and mixtures)	Analyzing	Assuming any two elements form compounds	Use models showing compound formation	
7.	Mixtures elements and compounds	Classifying mixtures based on observations	Analyzing	Confusing homogeneous and heterogeneous mixtures	Laboratory activities involving mixture classification	
8.	Mixtures elements and compounds	Distinguishing physical and chemical changes	Analyzing	Thinking all visible changes are chemical	Perform experiments demonstrating both changes	
9.	Mixtures elements and compounds	Identifying components of the fire triangle	Understanding	Confusing firefighting equipment with fire-triangle components	Use fire-triangle charts and demonstrations	
10.	Mixtures elements and compounds	Selecting methods of separating mixtures	Applying	Confusing separation methods and mixture types	Conduct practical separation activities	
11.	Mixtures elements and compounds	Calculating mass number from atomic number and neutrons	Applying	Confusing atomic number with mass number	Provide practice on atomic structure calculations using models and diagrams	
12.	Mixtures elements and compounds	Interpreting data to identify soft water	Analyzing	Assuming more soap indicates softer water	Conduct practical activities on water hardness testing	
13.	Mixtures elements and compounds	Classifying metals and alloys	Understanding	Confusing pure metals with alloys	Use samples and charts showing common alloys and their compositions	

Centre code:11205102 Centre Name: NGEGU						
INTEGRATED SCIENCE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
14.	Living things and their environment	Identifying the site of implantation in the female reproductive system	Understanding	Confusing implantation with fertilization	Use labelled reproductive system diagrams and models	
15.	Living things and their environment	Identifying functions of the skin	Understanding	Believing skin performs all body functions including gas exchange	Reinforce functions through body-system comparisons	
16.	Living things and their environment	Distinguishing plant and animal cell structures	Remembering	Confusing cell wall with cell membrane	Use microscopic observations and cell models	
17.	Living things and their environment	Understanding osmosis and membrane properties	Understanding	Confusing osmosis with diffusion	Demonstrate osmosis using potato strips or egg experiments	
18.	Living things and their environment	Evaluating environmentally friendly mosquito control methods	Evaluating	Assuming chemical methods are always best	Promote ecosystem-based pest control examples	
19.	Living things and their environment	Identifying requirements for photosynthesis	Remembering	Confusing products and requirements of photosynthesis	Use experiments showing the role of light in photosynthesis	
20.	Living things and their environment	Relating dentition structure to feeding habits	Analyzing	Difficulty linking teeth shape to diet	Use skull and dentition comparisons of herbivores carnivores and omnivores	
21.	Living things and their environment	Identifying characteristics of insect-pollinated flowers	Analyzing	Confusing insect-pollinated and wind-pollinated features	Use real flower specimens for comparison	
22.	Living things and their environment	Identifying symbiotic relationships in ecosystems	Understanding	Confusing symbiosis with parasitism	Use examples from local ecosystems	
23.	Living things and their environment	Associating digestive organs with physiological processes	Analyzing	Confusing digestion ingestion and egestion	Use digestive-system charts and simulations	
24.	Force and Energy	Interpreting circuit diagrams to identify arrangements	Analyzing	Confusing series and parallel connections	Conduct practical circuit construction activities	

Centre code:11205102 Centre Name: NGEGU						
INTEGRATED SCIENCE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
25.	Force and Energy	Predicting behaviour of magnets from pole arrangement	Applying	Confusing attraction and repulsion of poles	Use bar magnets in practical demonstrations	
26.	Force and Energy	Identifying materials from observed properties	Applying	Failure to connect magnetism with iron	Use classification activities based on material properties	
27.	Force and Energy	Identifying energy transformations in solar-powered devices	Analyzing	Confusing forms and sequence of energy transformation	Demonstrate energy conversion using solar kits	
28.	Force and Energy	Relating pressure to area of contact	Applying	Believing pressure decreases when area decreases	Practical activities using blocks and force measurements	
29.	Force and Energy	Identifying parts of a concave mirror	Understanding	Confusing principal focus with other mirror parts	Use ray diagrams and mirror experiments	
30.	Force and Energy	Identifying parts of a wave	Understanding	Confusing wavelength amplitude and frequency	Use wave models ropes and simulations	
31(a).	Scientific Investigation	Identification of basic science process skills (measurement and observation).	Remembering	Learners state the use of a metre rule instead of the science skills acquired; give unrelated skills; provide only one skill.	Emphasize science process skills through practical activities and matching exercises linking instruments to skills.	
31(b).	Scientific Investigation	Recall of standard SI units for physical quantities.	Remembering	Confusing SI units with non-SI units (e.g. centimetre instead of metre minute instead of second); incorrect symbols (e.g. M for metre).	Use charts of SI based quantities and units; provide regular drills on unit names and symbols.	
32(a).	Mixtures elements and compounds	Classification of mixtures based on observable characteristics.	Understanding	Classifying sandy water as homogeneous; assuming all water samples are pure substances; confusion between homogeneous and heterogeneous mixtures.	Use practical demonstrations of different mixtures and guide learners to observe whether components are uniformly distributed or visibly distinct.	

Centre code:11205102 Centre Name: NGEGU						
INTEGRATED SCIENCE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
32(b).	Mixtures elements and compounds	Knowledge and application of separation techniques for mixtures.	Understanding	Learners suggest filtration instead of evaporation; omit heating step; fail to explain how salt is recovered.	Conduct practical activities on evaporation and distillation; allow learners to separate real mixtures and explain the process.	
33(a).	Mixtures elements and compounds	Recall of chemical symbols of common elements.	Remembering	Writing full names instead of symbols; incorrect capitalization (e.g. na o c); confusing sodium (Na) with nitrogen (N).	Use periodic table charts symbol drills flashcards and regular quizzes on element symbols.	
33(b).	Mixtures elements and compounds	Identification of uses of elements in everyday life.	Remembering	Giving properties instead of uses; confusing oxygen with carbon dioxide; vague responses.	Relate oxygen to breathing medical care and combustion through practical examples and discussions.	
34(a).	Mixtures elements and compounds	Identification and interpretation of particle models of matter.	Understanding	Confusing liquid and gas particle arrangements; relying on container shape rather than particle spacing.	Use particle-model diagrams simulations and demonstrations showing solids liquids and gases.	
34(b).	Mixtures elements and compounds	Interpretation of changes of state from particle diagrams.	Understanding	Confusing melting with freezing; failure to identify direction of change; memorizing terms without understanding particle movement.	Use heating and cooling experiments and animations to demonstrate changes of state and particle behavior.	
35(a).	Living things and their environment	Identification of raw materials used in photosynthesis	Remembering	Learners may mention sunlight instead of raw materials	Emphasize the difference between raw materials and conditions for photosynthesis through experiments and diagrams	
35(b).	Living things and their environment	Identification of cell organelles	Remembering	Confusing chlorophyll with chloroplast	Use labelled diagrams and microscopic images of plant cells	
35(c) (i).	Living things and their environment	Explaining adaptation of leaves for photosynthesis	Understanding	Learners may state that broad leaves only store food	Demonstrate how large surface area increases light absorption	

Centre code:11205102 Centre Name: NGEGU						
INTEGRATED SCIENCE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
35(c) (ii).	Living things and their environment	Explaining functions of leaf structures	Understanding	Learners may think veins only support the leaf	Use diagrams to explain transport of water and manufactured food	
36(a) (i).	Living things and their environment	Interpretation of a food web and construction of food chains	Understanding	Learners may reverse arrow direction or omit producers	Teach that arrows show direction of energy flow and provide practice with food chains and webs	
36(a) (ii).	Living things and their environment	Identification of producers in an ecosystem	Remembering	Learners may identify herbivores as producers	Emphasize that producers make their own food through photosynthesis	
36(b).	Living things and their environment	Explanation of environmental effects on ecosystems	Understanding	Learners may give unrelated effects such as floods	Use real-life examples and discussions on drought impacts on plants and animals	
37(a).	Living things and their environment	Identification of parts of the urinary system	Remembering	Learners may mention organs from other body systems	Use labelled diagrams of the urinary system	
37(b).	Living things and their environment	Relating structure to function in body systems	Understanding	Learners may mismatch organs and functions	Reinforce functions using charts and matching activities	
37(c).	Living things and their environment	Identification of excretory products	Remembering	Learners may confuse faeces with excretory products	Teach the difference between excretion and egestion	
38(a).	Force and Energy	Identification of components of an electric circuit	Remembering	Learners may identify the bulb as the source of electricity	Use practical circuit set-ups to identify circuit components	
38(b).	Force and Energy	Observation and interpretation of simple circuits	Understanding	Learners may state that electricity "moves" instead of describing the bulb lighting	Conduct practical activities with working circuits for observation	
39(a).	Force and Energy	Demonstration and description of wave production	Understanding	Learners may state that the rope itself moves from one end to another	Demonstrate wave generation practically using a rope or slinky spring	
39(b) .	Force and Energy	Identification of wave types	Remembering	Learners may confuse transverse and longitudinal waves	Use demonstrations showing direction of vibration relative to movement of the wave	

Centre code:11205102 Centre Name: NGEGU						
INTEGRATED SCIENCE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
39(c).	Force and Energy	Application of knowledge of wave types	Understanding	Learners may give examples of longitudinal waves instead of transverse waves	Use charts and real-life examples of different waves	
40(a).	Force and Energy	Identification of factors affecting pressure in liquids	Remembering	Learners may state volume instead of depth	Carry out experiments showing water pressure at different depths	
40(b) .	Force and Energy	Prediction and interpretation of results in an experiment	Applying	Learners may draw the jet in the wrong direction or distance	Guide learners in observing how pressure changes with depth through practical activities	
40(c).	Force and Energy	Identification of factors affecting liquid pressure	Remembering	Learners may repeat depth instead of another factor such as density	Teach all factors affecting liquid pressure using experiments and illustrations	

Centre code:11205102 Centre Name: NGEGU						
AGRICULTURE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
1.	Food Production Processes	Preparing Planting Site	Applying	Relating size of planting materials to the tilth required	Focus determination of tilth using size of planting materials	
2.	Production Techniques	Using a framed suspended garden for growing crops.	Understanding	Selecting inappropriate plants for suspended gardens	Ephasise appropriate plants for suspended gardens	
3.	Food Production Processes	Planting	Remembering	Incorrect transplanting procedure	Engage learners in the actual transplanting exercise	
4.	Food Production Processes	Preparing animal products	Analying	incorrect sorting of eggs	Egg sorting and preparation should be emphasised	
5.	Hygiene Practices	Maintaining hygiene in animal rearing	Applying	Incorrect rearing practices for chicken	Emphasise correct animal rearing practices	
6.	Conservation of Resources	Pasture conservation	Understanding	Reading for meaning	Focus on comprehension	
7.	Conservation of Resources	integratated farming	Creating	Incorrect application of integrated farming concepts	Reinforce the different elements of integratated farming	
8.	Conservation of Resources	Forage conservation	Understanding	Confusing methods of forage conservation	Actual conservation of forage using different methods	
9.	Production Techniques	Making a sun drier	Understanding	Lack of practical experience on the making and working of a sun drier	Make and explain the working of a sun drier	
10.	Production Techniques	Grafting	Applying	Incorrect grafting procedure	Learners should practice grafting techniques	
11.	Food Production Processes	Organic farming	Analying	Confusing elements of organic farming	Engage learners in organic farming practices	
12.	Food Production Processes	Fish processing for conservation	Applying	Incorrect procedure of fish processing	Engage learners in the actual fish processing steps	
13.	Food Production Processes	Milk preservation	Applying	Incorrect milk preservation steps	Learners should practically conserve milk and the steps explained	
14.	Conservation of Resources	Characteristics of indigenous trees	Applying	Confusing characteristics of indigenous and exotic trees	Emhasize the importance of indigenous trees	

Centre code:11205102 Centre Name: NGEGU						
AGRICULTURE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
15.	Food Production Processes	Planting at correct spacing	Applying	Incorrect spacing of tomatoes during planting	Relate plant size/growth characteristics to spacing	
16.	Conservation of Resources	Soil erosion control	Evaluating	soil erosion control not understood	Emphasize soil erosion control methods	
17.	Conservation of Resources	Water harvesting	Evaluating	Incorrect water harvesing method	Link water harvesting method to apprpriate contexts	
18.	Production Techniques	Vertical gardening	Understanding	Vertical gardening concept and importance not understood	Emphasize importance of vertical gardening in the use of available space	
19.	Conservation of Resources	Examining appropriate practices to observe when conserving leftover foods	Analysis	Assuming that leftover food remains safe for consumption as long as it is covered or reheated without considering proper storage conditions storage duration and food safety guidelines.	Use real-life scenarios photographs of properly and improperly stored leftovers and discussions on food spoilage to help learners distinguish between safe and unsafe food conservation practices.	
20.	Conservation of Resources	Identifying appropriate practices that help conserve nutrients when cooking vegetables	Understanding	Learners thinking that cooking vegetables for a longer time and in large amounts of water helps preserve or increase their nutrients rather than realizing that excessive heat and water can cause nutrient loss.	Expose learners to experiences which enable them identify practices that help to conserve nutrients when cooking foods. Use varied media such as ICT devices photographs during teaching and learning.	
21.	Food Production	Identifying benefits of steaming food	Understanding	Learners may think that steaming makes food tasteless and therefore less healthy.	Expose learners to experiences which enable them identify benefits of steamed foods/advantages of steaming food. Use varied media such as ICT devices photographs during teaching and learning.	

Centre code:11205102 Centre Name: NGEGU						
AGRICULTURE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
22.	Food Production	Ability to define roasting as a method of cooking	Remembering	Learners thinking that roasting is the same as frying food rather than understanding that it is a method of cooking food using dry heat.	Expose learners to experiences which enable them identify and define different methods of cooking. Use varied media such as ICT devices photographs during teaching and learning.	
23.	Food Production	Identifying reasons that can make roast beef to be undercooked in the inside	Understanding	Learners thinking that roast beef is fully cooked once the outside turns brown without considering factors such as internal temperature thickness of the meat cooking time and oven temperature.	Expose learners to experiences which enable them understand different methods of cooking food. Use varied media such as ICT devices photographs during teaching and learning.	
24.	Food Production	Examining food preservation methods to identify one that can be used to preserve both meat and milk	Analysis	Learners may believe that any preservation method used for meat can also be used for milk without considering the suitability of the method for different types of food	Teachers to adopt practical teaching and learning approaches when teaching food preservation. Use field trips and expose learners to food processing procedures in food processing firms	
25.	Hygiene Practices	Identifying reasons for disinfecting kitchen towels	Understanding	Learners thinking that kitchen towels need disinfection only when they are visibly dirty rather than understanding that disinfection helps eliminate harmful microorganisms and prevent cross-contamination	Expose learners to experiences to enable learners understand the purpose of disinfecting clothes. Use varied media such as ICT devices photographs during teaching and learning.	
26.	Hygiene Practices	Identifying reasons why chemicals should not be used to disinfect kitchen towels	Understanding	Confusing fabric softeners and disinfectants and thinking that they serve the same purpose	Comprehensively explain to learners why chemicals are not suitable for disinfecting kitchen clothes. Use varied media such as ICT devices photographs during teaching and learning.	

Centre code:11205102 Centre Name: NGEGU						
AGRICULTURE ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
27.	Hygiene Practices	Examining activities carried out during special cleaning of a kitchen	Analysis	Learners thinking that special cleaning of a kitchen is simply routine daily cleaning rather than a thorough process that involves deep cleaning areas equipment and surfaces that are not cleaned regularly	Expose learners to experiences which enable them understand the various methods of cleaning and the purposes for which they are done. Use varied media such as ICT devices photographs during teaching and learning.	
28.	Production Techniques	Identifying the purpose of using animal fat when making soap	Understanding	Thinking that animal fat is added to soap mainly to improve its smell or colour	Comprehensively explain to learners the purpose of using various ingredients when making soap. Use varied media such as ICT devices photographs during teaching and learning.	
29.	Production Techniques	Analysing an illustration to identify the stitch used to make an article	Analysis	Learners identifying the stitch based on the type of article shown rather than analysing the visible characteristics and pattern of the stitch in the illustration	Expose learners to practical experiences in clothing construction processes. Use varied media such as ICT devices photographs during teaching and learning.	
30.	Production Techniques	Identifying how to make the illustrated stitch	Evaluating	Confusing knitting with crocheting	Expose learners to practical experiences in clothing construction processes. Use varied media such as ICT devices photographs during teaching and learning.	

Centre code:11205102 Centre Name: NGEGU						
AGRICULTURE ANALYSIS REPORT

26.	People and Relationships	Recall Explanation	Understanding	Limited information on African Diaspora	Deeper reading and research. Resource person.	
27.	People and Relationships	Recall Explanation	Analysing	Few points on the merits of using moneyas opposed to barter trade	Deeper reading and research. Teacher guidance.	
28.	People and Relationships	Recall and identification	Understanding	Inability to distinguish between cultural globalisation and other types of globalisation	Deeper reading and research. Teacher guidance.	
29.	Political Development and Governance	Recall and identification	Understanding	Inability to dfferentiate between the CBE Values and those Values in the Constitution	Deeper reading and research. Teacher guidance.	
30.	Natural and Historic Built Environments	Idwntification of vegetation measuring distances identification of economic activities and transport type of an area determining the direction of a place from one point	Remembering Applyiing Analysing Evaluating Understanding	Inability to interprete maps and related features	Teacher guidance	
31.	Natural and Historic Built Environments	Recall and identification	Remembering	Giving the effects of climate rather than effects of climate change	Teacher guidance	
32.	Natural and Historic Built Environments	Recall and identification	Understanding	Some learners not understanding the concept of environmental degradation	Teacher guidance	
33.	Natural and Historic Built Environments	identification analysis	Remembering analysing evaluation	Inability to identify the marked points in the map of Africa.	Deeper reading and teacher guidance	
34.	Natural and Historic Built Environments	Recall and identification	Remembering	Giving reasons for colonialism rather than for scramble and paartition of Africa.	Deeper reading and teacher guidance	

Centre code:11205102 Centre Name: NGEGU						
CHRISTIAN RELIGIOUS EDUCATION ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
1.	Creation	Item tested on a similar teaching about human beings that is found in the stories of creation in Genesis chapter 1 and 2.	Creating	Failure to distinguish a similar teaching about human beings that is found in the stories of creation in Genesis chapter 1 and 2.	Teacher to guide learners to read the Bible references provided / Engage learners in group activities to discuss & summarise similar teachings about human beings found in the 1st & 2nd accounts of creation.	
2.	Creation	Tested the consequences of disobedience of Adam and Eve to God	Applying	Inadequate knowledge on the story on the fall of human beings. / Failure to comprehend the consequences of disobience of Adam & Eve to God.	Use different methods of teaching / discussion / roleplay to enable learners tease out effects of disobedience to God	
3.	The Bible	Tested categorisation of the books of the Bible.	Analysing	Not familiar with the order of the books of the Bible / categorise books of the Bible	Guide learners to use different ways to categorise books of the Bible - flashcards / charts.	
4.	The Bible	Tested how the presence of God was manifested during the making of the covenant with Abraham.	Understanding	Failure to understand the events surrounding God's covenant with Abraham.	Use diverse methods such as illustrations charts or videos to explain how God's presence was manifested during the making of the covenant with Abraham. Encourage learners to read the Bible references provided.	
5.	The Bible	Identifying ways in which God prepared Moses for the leadership roles.	Evaluating	Unable to understand how God prepared Moses for leadership roles in Israel.	Guide learners to read Bible stories on the ministry of Moses / discuss / summarize different ways God prepared Moses for leadership roles.	

Centre code:11205102 Centre Name: NGEGU						
CHRISTIAN RELIGIOUS EDUCATION ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
6.	The Bible	Reasons why the Israelites demanded to have a king during the time of Prophet Samuel.	Understanding	inadequate understanding of the reasons why the Israelites demanded a king during the time of Samuel.	Guide learners to read the Bible references and discuss the account on Kingship in Israel.	
7.	The Early Life of Jesus Christ	Tested the knowledge of the prophet who foretold the Messiah would be called the Prince of Peace	Remembering	Inadequate knowledge of Old Testament prophecies concerning the Messiah / inability to link the messianic prophecies to specific prophets.	Task learners to read the Bible discuss and summarize on charts messianic prophecies based on the prophet who made them.	
8.	The Early Life of Jesus Christ	Tested the similarities on the annunciation of birth of both John the Baptist and that of Jesus as stated by Angel Gabriel.	Creating	Unable to compare / draw similarities on the birth of both John the Baptist and Jesus.	Teacher to use diverse methods such as discussions/ roleplay / read the Bible/ watch video clips on the birth of both John the Baptist and Jesus.	
9.	The Early Life of Jesus Christ	Tested knowledge of the people involved in the dedication of Baby Jesus.	Understanding	Inadequate knowledge on the people who were involved in the dedication of Baby Jesus.	Learners to read the Bible on the accounts of Jesus' presentation in the Temple/ discuss / dramatize the events during the incident.	
10.	The Early Life of Jesus Christ	Identifying lessons learnt from the incident when Jesus accompanied his parents for the Passover festival in the Temple at the age of twelve.	Applying	Inadequate understanding of the incident in which Jesus visited the Temple at age twelve / are unable to identify the main lesson from the event.	Learners to read the Bible on the incident when Jesus visited the Temple at age twelve / identify the main lesson from the event.	
11.	The life and Ministry of Jesus Christ	Identify a miracle of Jesus that shows healing by forgiviness of sins.	Analysing	Failure to connect the healing of the paralytic with Jesus' declaration " that your sins are forgiven."	Use Bible stories / pictures / or role-play to help learners distinguish different categories of miracles / Encourage learners to read the Bible stories / discuss them.	

Centre code:11205102 Centre Name: NGEGU						
CHRISTIAN RELIGIOUS EDUCATION ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
12.	The life and Ministry of Jesus Christ	Tested the main lesson learnt from the miracle of Jesus calming the storm	Evaluating	Have difficulty applying biblical teachings to real-life situations / main lesson learnt from the miracle of Jesus calming the storm.	Encourage learners to read the Bible stories / discuss lessons learnt.	
13.	The life and Ministry of Jesus Christ	Identifying a parable of Jesus that teaches Christians to celebrate when sinners repent.	Applying	Inability to deduce lessons from the parable of Jesus on the lost sheep.	Guide learners to read the Bible references provided discuss and summarize lessons learnt from the parable of the lost sheep by Jesus.	
14.	The Church	Tested the correct action to take when accidents occur.	Evaluating	Demonstrate limited understanding of the correct action to take during crisis / in case of an accident.	Expose / teach learners basic safety and emergency response procedures.	
15.	The Church	Tested the best way the church is involved in promoting education in Kenya today.	Evaluating	Limited knowledge on the role of the Church in education / outside the pulpit / unable to identify specific ways the Church supports education.	Invite resource persons from churches to discuss their contribution to education.	
16.	The Church	Identifying challenges that Christians face in their journey of faith and solutions to those challenges.	Applying	Inability to identify / apply Christian values that help believers to cope with challenges in daily life.	Use real-life scenarios and Bible stories such as Job Apostle Paul Daniel among others to illustrate how Christian values help overcome challenges. Task learners to identify challenges they face and the Christian values that can help address them.	
17.	Christian Living Today	Item tested learner's understanding of lifeskills that youth require to overcome irresponsible sexual behaviour.	Analysing	Inadequate understanding of life skills that help young people make responsible / informed decisions regarding relationships and sexuality.	Task learners to discuss case studies / life experiences / encourage learners to practice life skills that enable them to overcome irresponsible sexual behaviour.	

Centre code:11205102 Centre Name: NGEGU						
CHRISTIAN RELIGIOUS EDUCATION ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
18.	Christian Living Today	Item tested understanding of the different types of bullying practiced in Kenya today.	Analysing	Failure to identify different forms of bullying and their effects on individuals.	Teacher to guide learners search and summarise the different forms of bullying (physical verbal social and cyberbullying) and their consequences / Use different methods such as role plays and case studies to help learners recognize and respond to bullying situations.	
19.	Christian Living Today	Item tested learner's knowledge on their talents and abilities.	Evaluating	Inadequate understanding of their talents and abilities.	Task learners to identify and showcase their talents through clubs / sports / music / drama / other co-curricular activities.	
20.	Christian Living Today	Item tested learners ability to indentify the importance of leisure	Applyling	Inability to identify the importance of leisure.	Assign learners to research & present the benefits of leisure.	
21a.	Creation	Tested the differences between the 1st and 2nd accounts of creation.	Analysing	Failure to differentiate the 1st and 2nd accounts of creation.	Use diverse methods such as reading the Bible references / discussions / drawing comparison charts on the differences between the 1st and 2nd accounts of creation.	
21b.	Creation	Identifying the attributes of God from the accounts of creation.	Understanding	inability to identify attributes of God from the accounts of creation	Task learners to read Genesis 1 and 2; and deduce atttributes of God from the accounts of creation.	
22.	Creation	Tested how responsible use of plants contributes to economic growth in Kenya.	Evaluating	Inadequate understanding of responsible use of plants in Kenya for economic growth.	Take learners for nature walk / field visits to farms / forests / agricultural projects / guide them to research on responsible / sustainable use of plants.	

Centre code:11205102 Centre Name: NGEGU						
CHRISTIAN RELIGIOUS EDUCATION ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
23.	The Bible	Tested the importance of the Bible to Christians today.	Evaluating	Inability to evaluate the importance of the Bible to Christians today.	Use different methods of teaching / learning to enable learners evaluate the importance of the Bible to Christians today.	
24.	The Bible	Tested ways in which Abraham demonstrated faith in God	Understanding	Limited understanding of how Abraham demonstrated faith in God in different situations.	Task learners to read the Bible / brainstorm / summarise how Biblical figures demonstrated their faith in God / tease out the case of Abraham.	
25.	The Bible	Tested the failures of King Saul	Analysing	Unable to distinguish failures of king Saul from other leaders in Israel	Task learners to brainstorm and draw charts / diagrams to summarise failures of different leaders in Israel.	
26a.	The teachings of Jesus Christ	Item tested ability to describe the parable of the lost sheep as narrated by Jesus	Understanding	Inadequate knowledge on the parable of the lost sheep.	Encourage learners to read the Bible reference provided on the lost sheep / summarise key points.	
26b.	The teachings of Jesus Christ	Tested ways through which Christians bring sinners to God.	Applying	Inability to identify ways Christians bring sinners to God.	Invite church leaders as resource persons to share experiences / task leraners to brainstorm their own experiences of bringing sinners to God.	
27a.	The Ministry of Jesus Christ	Tested on events that took place on the Mount of Olives when Jesus & his disciples went to pray just before his arrest.	Analysis	Difficulty identifying the events that took place at the Mount of Olives when Jesus and his disciples went to pray before he was arrested.	Encourage learners to read the Bible to familiarize themselves with events that took place at the Mount of Olives before the arrest of Jesus / learners to use dramatization / role play to illustrate the events on Mount of Olives before arrrest of Jesus.	

Centre code:11205102 Centre Name: NGEGU						
CHRISTIAN RELIGIOUS EDUCATION ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
27b.	The Ministry of Jesus Christ	Item tested the benefits of prayer in the life of a Christian.	Evaluating	Failure to explain the importance of prayer in the daily life of a Christian.	Task learners to discuss the importance of prayer in the life a Christian / encourage regular class devotions and prayer sessions.	
28a.	The Church	Identifying the events that took place on the Day of Pentecost	Analysis	Inadequate knowledge on the events that toook place on the Day of Pentecost	Encourage learner to read the Bible to familiarize themselves with the events that occurred on the Day of Pentecost / learners to dramatize / role play the events that occurred on the Day of Pentecost.	
28b.	The Church	Identifying gifts to the Holy Spirit that Christians manifest today.	Appplying	Inability to distinguish the manifestation of the gifts of the Holy Spirit with the manifestation of the fruit of the Holy Spirit.	Learners to read the Bible / brainstorm / summarize / draw charts /and present how Christians manifest the gifts of the Holy Spirit today.	
29a.	Christian Living Today	Item tested the causes of early marriages in Kenya today.	Evaluating	Failure to outline the causes of early marriages in Kenya today / have limited understanding on the causes of early marriage.	Teacher to conduct awareness programs on the dangers of early marriage / Invite guidance and counselling personnel to speak to learners / teach children's rights and responsibilities.	
29b.	Christian Living Today	Item tested on sexual practices that are forbidden by God.	Understanding	Failure to identify sexual practices forbidden by God.	Task learners to read the Bible / discuss / summarise sexual practices forbidden by God / Involve parents / religious leaders / counsellors in mentoring learners.	

Centre code:11205102 Centre Name: NGEGU						
CHRISTIAN RELIGIOUS EDUCATION ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
30a.	Christian Living Today	Tested the Christian teaching on marriage.	Analysis	Inability to distinguish between Christian and secular teachings on marriage.	Engage learners in discussions / role plays / case studies on healthy relationships / Learners to summarise Christian teaching on marriage.	
b.	Christian Living Today	Tested ways in which human rights may be violated in Kenya today.	Evaluating	Some learners may not be aware of the actions that violate human rights / they may have limited knowledge of legal and moral responsibilities in protecting life.	Teach human rights and responsibilities through relevant lessons and discussions / promote peace education and conflict-resolution skills / Involve learners in community activities that promote respect for human rights.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
1.	Creating and Performing (Rhythm)	Identify the effect of a dot on a note value	Understanding	Confusing the dot with staccato or accent marks; thinking the dot increases pitch or loudness; assuming the note value doubles instead of increasing by half.	Use visual timelines showing original and dotted values clap and count examples compare with non-dotted notes in simple bars and highlight the difference from articulation dots.	
2.	Foundations of Creative Arts and Sports	Read a keyboard diagram and identify letter names of given keys (including sharps/flats).	Applying	Losing orientation of where C is; misreading black keys as fixed 'sharp only' or 'flat only'; counting wrong direction along the keyboard.	Anchor C on the keyboard visually practise naming white keys first then derive sharps/flats and use step-by-step labelling exercises with small groups.	
3.	Foundations of Creative Arts and Sports	Identify economic roles of Creative Arts in society.	Understanding	Believing arts are only for entertainment; confusing social roles (unity citizenship) with direct economic roles; assuming only sports create employment.	Use case studies of local artists and creative entrepreneurs map different jobs in the creative sector and have learners classify roles as social cultural or economic.	
4.	Creating and Performing (Rhythm)	Translate written rhythmic notation into French rhythm names.	Applying	Miscounting beat values; confusing taa with ta-te; reading from right to left; ignoring longer note values such as taa-aa.	Drill call-and-response clapping with French names colour-code different note values and let learners build their own rhythm cards to practise sequencing.	
5.	Creating and Performing (Descant recorder)	Interpret descant recorder fingering to identify the corresponding pitch name.	Applying	Reversing which hand is on top; thinking that more closed holes always mean lower notes; mixing up octave marks	Use clear wall charts showing left/right hands practise fingerings on silent recorders and relate pitch height to number and position of open holes.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
6.	Creating and performing (Melody)	Identify solfa syllables that match a notated or heard melody.	Applying	Confusing direction of pitch (up vs down); relying on letter names instead of solfa; assuming equal spacing between all notes regardless of staff position.	Sing scale patterns with hand signs trace melodic contour with arrows and give plenty of echo-singing exercises where learners label solfa aloud.	
7.	Creating and Performing (Rhythm)	Relate rest symbols to equivalent note values within a rhythmic pattern.	Analyzing	Treating rests as 'nothing' and ignoring them; confusing shapes of rests with each other; focusing on number of symbols instead of total duration.	Use body percussion with silent gestures for rests match each rest to its note value on a chart and practise filling in missing notes/rests in simple bars.	
8.	Creating and performing (Melody)	Interpret dynamic and tempo-related hairpin symbols in music.	Understanding	Confusing 'getting louder/softer' with 'faster/slower'; reading the direction of the sign incorrectly; assuming both symbols mean the same thing.	Model crescendos and decrescendos vocally and on instruments link the signâ€™s opening/closing shape to sound change and let learners draw and perform examples.	
9.	Creating and Performing (Descant recorder)	Describe correctly the pinching technique on descant recorder.	Understanding	Fully closing the thumb hole instead of half-covering; thinking pinching is for low notes; blowing too hard and blaming the thumb instead of breath control.	Demonstrate half-hole technique slowly use mirrors so learners see thumb position practise long tones on relevant notes and compare sound with full thumb closure.	
10.	Creating and Performing (Songs)	Identify appropriate vocal phrasing technique in folksong performance.	Analyzing	Equating good singing with taking frequent breaths; confusing phrasing with diction or projection; ignoring the meaning of text when planning breaths.	Mark phrase lines on lyrics practise singing entire phrases on one breath model poor vs good phrasing and discuss how phrasing affects meaning and flow.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
11.	Creating and performing (Melody)	Match accidental symbols (sharp flat natural) with their pitch functions.	Understanding	Thinking the natural sign raises or lowers by a semitone; assuming all accidentals only raise pitch; confusing visual shapes of sharp flat and natural.	Use a keyboard to demonstrate semitone changes show before-and-after staff examples and create flashcards where learners explain each signâ€™s effect.	
12.	Creating and Performing (Play)	Differentiate elements of drama from non-dramatic features.	Understanding	Assuming anything seen on stage is an element of a play; confusing costume or ornaments with structural elements like plot and theme.	Co-construct a chart of play elements (plot theme character setting language) analyse a short skit to identify them and contrast with decorative aspects.	
13.	Creating and Performing (Narrative/Verse)	Identify core elements of a narrative (story structure).	Understanding	Treating exposition as separate from a story; mixing up character and setting; believing any event in a text is automatically 'plot'.	Use story maps highlighting characters setting plot and exposition retell familiar stories and label each element and have learners build simple story outlines.	
14.	Creating and Performing (Story)	Identify effective vocal techniques in storytelling (tone pace intonation).	Evaluating	Thinking shouting equals good audibility; believing monotone is 'serious' storytelling; confusing speed with expressiveness.	Record and playback learnersâ€™ storytelling explore different tonal variations for the same line practise pacing through timed retellings and get peer feedback on clarity.	
15.	Creating and Performing (Narrative/Verse)	Explain the role of props in enhancing verse performance.	Understanding	Seeing props as mere decoration; over-relying on props instead of expression; confusing props with costumes or set design.	Show contrasting performances with and without purposeful props discuss how a chosen prop supports meaning and guide learners to design simple functional props.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
16.	Creating and Performing (Folksong)	Identify the musical role of kayamba in a folksong performance.	Understanding	Assuming kayamba plays melody or pitches the song; treating all instruments as melodic; not recognising its function in setting tempo and providing rhythm.	Use audio/video of kayamba in context let learners clap or shake simple shakers to feel tempo and compare kayambaâ€™s role with melodic instruments in the same song.	
17.	Foundations of Creative Arts Sports	Identifying careers in creative Arts and Sports	Applying	Learners confusing hobbies and interests with career	Teachers should use clear explanations real-life examples practical-oriented activities visual comparisons discussions formative assessments and reinforcement to help learners distinguish between hobbies interests and careers effectively.	
18.	Foundations of Creative Arts Sports	Components of physical fitness	Analysing	Learners exhibited limitation in understanding the key components of physical fitness	Teachers should use clear explanations with real-life examples incorporate practical demonstrations and physical activities apply visual aids such as charts and diagrams encourage use formative assessments with timely feedback and provide continuous reinforcement to help learners clearly understand and differentiate the components of physical fitness.	
19.	Creating and performing	Sequence in a javelin throwing skill	Analysing	Most learners confusing the sequencial order of a javeline throw	Teachers should apply practical approach when teaching the skill of throwing a javeline	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
20.	Creating and performing	Demonstration of a Flick pass in handball	Analysing	Most learners could not identify a flick pass despite the question giving the teaching points	Physical Education is a practical subject where learners are expected to be involved in practical performance of activities. Teachers are encoraged to ensure learners get enough pracice for masterly of skills	
21.	Creating and performing	Determining appropriate situation to apply a place shot	Evaluating	Learners had a challenge differentiating place shot from other football skills	Teachers should expose learners to the target skills then allow ample time for practice to enhance masterly.	
22.	Creating and performing	Identifyng a rule in Middle distance races that ensures athletes cover the same distance during the race	Evaluating	Failure of learners to determine the specific rule that ensures all athletes cover the same distance during the race	Let the learners participate and practice the races inorder to facilitate masterly of rules	
23.	Creating and performing	Footwork skill in netball	Analysing	Learners failure to identify the footwork error committed	Ensure learners are engaged in performance of the targetted skills	
24.	Creating and performing	Identifyng volley skill in the game of volleyball	understanding	Learners confusing the different skills in volleyball	Embrace drill practice to develop the skill	
25.	Creating and performing	Interpreting rules governing triple jump in athletics	Evaluating	Learners failure to determine circumstances when a red flag is applied in triple jump	Teachers to expose learners by demonstrating red flag situations in triple jump. A video analysis could help. Learners could also be assigned officiating roles to help them practice.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
26.	Creating and performing	Determining pop pass in the game of rugby	Analysing	Most learners were unable to identify pop pass even though the question provided the relevant teaching points	Teachers are encouraged to use demonstration guided practice and drill exercises emphasizing key teaching points to help learners correctly identify and perform a pop pass	
27.	Creating and performing	Describing specific situations when chest pass is applied in basketball	Analysing	Learners having misconceptions in situations when chest pass is applied in basketball	Teachers should demonstrate proper chest pass technique teach when it is appropriate to use it through guided drills with defenders and reinforcing it in game-like scenarios	
28.	Appreciation in Creative Arts and Sports	Making a scenario based judgement on appreciation of Creative Arts and Sports	Evaluating	Learners expressing low ability to critical thinking and problem solving	Teachers are encouraged to engage learners in guided questioning real-life and game-based scenarios and practical activities that require analysis decision-making and reflection while providing continuous feedback to help them evaluate situations and choose appropriate solutions	
29.	1.0 Foundations of Creative Arts and Sports. 1.1 Careers in Creative Arts and Sports (b) Illustrate entrepreneurial opportunities in creative arts and sports SLE; Exhibitions	Understanding the roles and functions of creative arts in society	Understanding	Learners may focus on personal benefits (self-expression or economic gain) rather than identifying the role highlighted by an exhibition involving the community. Difficulty linking art activities to social outcomes.	Use real-life examples of exhibitions festivals and community art projects to demonstrate various roles of art. Engage learners in discussions on how art contributes to society.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
30.	2.0 Creating and Performing 2.1 Drawing and Painting SLE - wash technique Grade 8 p.18	Identification of painting techniques and art vocabulary	Remembering	Confusing wash technique with sponge finger painting or brush stroke techniques. Limited practical exposure to painting methods.	Provide practical demonstrations of different painting techniques and allow learners to experiment with each technique while documenting observable characteristics.	
31.	Type of balance - radial	Analysis of design elements and principles of art	Analyzing	Confusing radial balance with symmetrical balance because both create a sense of order. Difficulty recognizing a central focal point from which elements radiate. Many confused radial balance with other balance types (Option C most selected)	Use visual comparisons of symmetrical asymmetrical radial and linear balance. Encourage learners to create artworks demonstrating each type	
32.	Drawing and Painting; Shading technique	Understanding stages and processes in drawing	Analyzing	Learners may fail to distinguish between sketching drawing and shading stages. Some may interpret the second image simply as a completed drawing rather than recognizing the shading process.	Teach drawing as a sequential process through demonstrations showing progression from observation to sketching shading and completion. Use process portfolios.	
33.	Still life painting critique: improving contrast without changing colour scheme	Analyzing a still life painting and selecting an improvement that enhances form/contrast while maintaining the existing colour scheme.	Analyzing	Learners may think improvement means adding bright colours; confuse colour scheme with tonal value; fail to understand that white highlights can improve form and focal points without changing the colour scheme; select darkening the background without considering whether it alters balance or emphasis.	Use critique exercises comparing changes in colour tone and highlights. Demonstrate how white highlights create form depth and focal points while preserving a colour scheme. Let learners improve sample still life drawings using highlights shadows and background tone then explain which changes maintain the original colour scheme.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
34.	Ornamentation; Alternate repeat patterns	Analyse visual patterns and recognise pattern organization	Understanding	Confusing decorative and functional objects; inability to identify intended use from appearance.	Use real artefacts and ask learners to classify them as decorative functional or both. Organize recycling projects and exhibitions where learners explain the purpose of their creations.	
35.	2.0 Creating and Performing 2.3 Javelin and Sculpture ; Carving; Finishing Grade 7 SLO (b) p.10	Recognizing social and cultural benefits of performing arts	Understanding	Confusion between different types of repeat pattern alternate full drop full repeat Learners may have been exposed to definitions without sufficient visual examples or practical application. Limited experience in analysing real-life designs which makes it difficult for learners to transfer theoretical knowledge to authentic contexts.	Emphasise hands-on activities involving pattern creation and classification where learners produce and compare different types of repeats. Visual scaffolding using labelled examples of each pattern type to strengthen clarity. Learners should also be guided to describe patterns verbally explaining why a pattern is alternate rather than regular to deepen understanding and exposure to real objects	
36.	Complementary colours	Identifying complementary colour pairs on the colour wheel and relating them to strong contrast/focal point creation.	Remembering	Confusing complementary colours with primary secondary or analogous colour pairs; assuming any two bright colours create complementary contrast; limited practice using the colour wheel to locate opposite colours.	Use colour wheels regularly and guide learners to identify colours directly opposite each other. Let learners construct colour wheels match complementary pairs such as red-green blue-orange and yellow-violet and create small artworks showing how complementary colours create contrast and focal points.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
37.	Decorating techniues-engraving and painting	Identifying two techniques used in decorating an object	Analysing	Learners misidentify decoration techniques due to limited practical exposure and superficial observation leading them to mistake engraving for burning or painting for pasting. This shows weak understanding of art techniques and their visual effects.	Incorporate hands-on activities where learners experiment with different techniques such as scratching surfaces to simulate engraving or applying paint to observe finishing effects. Visual comparison of objects decorated using different techniques. Learners should also be guided to describe what they see before naming the technique helping them connect observation with terminology.	
38.	2.0 Creating and Performing 2.6 Fabric Decoration SLO (b) Grade 8 p.29Tie and dye fabric decoration process	Sequencing the correct steps in tie-and-dye fabric decoration: dampen the fabric tie the fabric dip in dye and untie the fabric.	Applying	Learners may memorize isolated steps without understanding the process; misorder dampening tying and dyeing; assume fabric should be tied before dampening; omit the final untying stage; limited hands-on experience with tie-and-dye activities.	Use step-by-step practical demonstrations of the full process: dampen the fabric tie it firmly dip it in dye then untie it after dyeing. Let learners arrange picture/word cards in the correct order practise the process in groups and explain the purpose of each step before carrying out the activity.	
39.	2.0 Creating and Performing 2.3 Javelin and Sculpture ; Carving; Finishing Grade 7 SLO (c) p.10	Sequencing procedures in art production	Analyzing	Learners memorize steps without understanding the workflow.	Use practical carving projects emphasizing planning and sequence. Learners should document each stage in portfolios or process journals.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
40.	1.0 Foundations of Creative Arts and Sports. 1.1 Careers in Creative Arts and Sports (b) Illustrate entrepreneurial opportunities in creative arts and sports	Evaluating visual communication requirements;distinguish functional lettering considerations in logo design from aesthetic ones in relation to communication purpose and readability.	Analyzing	learners struggled to distinguish primary functional lettering considerations from aesthetic ones	Analyze logos and discuss design principles Have learners design logos for school clubs or community projects and justify their choices	
41.	Creating and Performing (Melody)	Notate the ascending scale of F major correctly in semi-breves on the treble staff without using a key signature.	Applying	Learners may: forget the B flat in F major; start on the wrong tonic; place notes on wrong lines/spaces; misinterpret 'without key signature' and still add a key signature; confuse semi-breves with other note values.	Review structure of F major (pattern of tones/semitones B flat) practise writing scales both with and without key signatures use staff templates and keyboard diagrams to reinforce correct placement and do guided whole-class notation before individual attempts.	
42.	Creating and Performing (Melody)	Compose an answering phrase to complete a short melody maintaining melodic rhythmic and tonal coherence over four bars.	Creating	Learners may: ignore the key and end on a non-tonic note; break the rhythmic feel of the opening phrase; write an answering phrase that is too short/too long; misunderstand 'answering phrase' and simply copy the first phrase; mix clefs or note values incorrectly.	Model question & answer phrase pairs analyse simple call-and-response melodies give scaffolded tasks (fill last two notes then full bar) encourage singing while composing to check musical sense and use peer review to test if the phrase sounds complete.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
43.	Appreciation in Creative Arts and Sports	(a) Interpret notational and expressive signs; identify repetition and pitch in a given score; (b) Explain functional roles of music in a social context (football match) and describe performance freedom of a soloist in traditional dance.	(a)Analyzing (b) Understanding ; (c)Create (in generating examples).	Learners may: misread the given musical signs (e.g. dynamics articulation); fail to spot exact repetition versus variation; misidentify the lowest pitch due to clef confusion; give vague or purely entertainment-based roles of music in football without linking to motivation unity or communication; misunderstand 'freedom' of the soloist as doing anything without regard to group structure or tradition.	(a) Teach common musical signs systematically using short score excerpts; practise locating repeated bars and sequences; use pitch ladders to compare note heights; (b) brainstorm and categorise specific roles of music in sports (motivation signalling celebration identity); (c) discuss framed examples of soloist behaviour that respects choreography rhythm and cultural norms while allowing improvisation.	
44.		(a) Identify key aspects of exposition in a story plot; (b) Explain reasons for vocal and physical warm-up before acting in a play.	(a) Understanding (conceptual); (b) Analyze (application to performance context).	Learners may: confuse climax or resolution with beginning of plot; omit critical exposition elements such as setting main characters and initial situation; see warm-ups as optional or only for professionals; give superficial reasons like 'to avoid being shy' without linking to vocal clarity injury prevention or concentration.	(a) Use story maps to highlight exposition (who where when initial situation); analyse familiar stories and plays focusing on how they begin; (b) demonstrate simple vocal and physical warm-up routines and connect each exercise to its function (breath support articulation flexibility); let learners reflect on performance experiences with and without warm-up.	

Centre code:11205102 Centre Name: NGEGU						
CREATIVE ARTS & SPORTS ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
45.	Foundations of Creative Arts Sports	Components of physical fitness	Analysing	Learners exhibited a gap in understanding the key components of physical fitness	Teachers should use clear explanations with real-life examples incorporate practical demonstrations and physical activities apply visual aids such as charts and diagrams encourage group work and discussions use formative assessments with timely feedback and provide continuous reinforcement to help learners clearly understand and differentiate the components of physical fitness.	
46.	Creating and performing	Phases in the performance of triple jump	Applying	Learners showed limited ability to clearly describe both the approach and the take-off phases involved in performing the triple jump	Teachers should use practical demonstrations simple clear terminologies and regular practice to help learners understand the phases of the triple jump.	
47.	Creating and performing	The skill of marking in a game of netball	Analysing	Learners showed difficulty between their understanding of concepts and explaining practical skills. Despite using marking techniques in netball they had challenges describing them.	The teacher should combine practical demonstrations with activities that encourage learners to explain the marking techniques they use. They should also use questioning discussion and reflection to help learners connect practical skills with understanding

Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
50.	Mat making using coil technique with reused fabric	Sequencing and outlining the steps followed in making a coiled fabric mat.	Applying	Learners may confuse coiling with weaving plaiting or stitching only; omit key steps such as preparing fabric strips starting the centre coil joining coils firmly and finishing the edge; give steps in the wrong order due to limited practical exposure.	Demonstrate the coil technique step by step: cut old fabric into strips twist/roll strips into cords start coiling from the centre while stitching or gluing continue joining coils to the desired size then secure and finish the edge. Let learners practise using fabric scraps arrange picture cards of the steps in order and display sample coiled mats for reference.	
51.	Paper stencil preparation for one-colour fabric printing	Describing the major steps followed when preparing a paper stencil for fabric printing.	Applying	Learners may describe printing instead of preparing the stencil; omit key steps such as drawing the design placing the paper on a cutting surface cutting out the positive/negative areas and securing/strengthening the stencil; confuse stencil printing with block printing or freehand painting; poor understanding of positive and negative spaces.	Demonstrate preparation of a paper stencil step by step: select or draw a simple design transfer/draw it on stiff paper place it on a cutting board carefully cut out the areas to be printed remove loose parts and test/secure the stencil before printing. Give learners practice using simple shapes emphasize safe cutting and use sample stencils to show positive and negative spaces.

Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
52.(i).	Painting critique: possible title and forms present	Analysing a painting to suggest a suitable title and identify forms present in the artwork.	Analyzing	Learners may give unrelated titles; describe objects generally without identifying forms; confuse shapes with forms; fail to support answers using evidence from the painting.	Use guided critique questions and visual analysis charts. Teach learners to observe first identify visible forms then suggest titles based on subject matter mood or theme. Provide sample artworks for learners to practise giving evidence-based titles and form descriptions.	
52.(ii).	Painting critique: use of colour	Analysing how colour has been used in the painting including colour choice contrast harmony mood and emphasis.	Analyzing	Learners may only list colours without explaining their effect; fail to mention contrast harmony or mood; confuse bright colours with good colour use; give unsupported personal opinions.	Teach colour analysis using prompts such as: What colours are dominant? Are they warm/cool? Do they create contrast or harmony? What mood do they create? Let learners compare paintings with different colour schemes and practise explaining colour effects.	
52. (iii).	Painting critique: use of space	Analysing how space is organized in the painting including foreground middle ground background balance and placement of forms.	Analyzing	Learners may describe the subject only and ignore space; fail to identify foreground middle ground and background; confuse space with size; overlook balance overlap or arrangement of objects.	Use artworks to demonstrate foreground middle ground and background. Guide learners to trace object placement overlaps and empty spaces. Provide critique templates that require comments on arrangement balance depth and how space guides the viewer's eye.

PRE-TECHNICAL STUDIES ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
1.	Foundations of Pretechnical Studies	Identification of Careers in Pre-technical studies	Rembering	A few learners had difficulty in stating the career which involves repairs motor vehicles	Teach the content in the design fully	
2.	Foundations of Pretechnical Studies	Appreciating the importance of safety in the work environment.	Understanding	A few learners could not tell the reaon why it is important to observe safety in a learning environment.	Teach all the content in the design and use practical examples where possible.	
3.	Communication in Pretechnical Studies	Identifying different types of drawing.	Understanding	Some of the learners could not identify the type of drawing in the question.	Use practical examples to explain different types of drawings	
4.	Materials for Production	Identifying of Materials for a particular use	Applying	A few learners had difficulty identifying the material to use for improvising a basin	Use locally available resources to explian to the learners different uses of materials.	
5.	Tools and Production	Selecting tools for a given task	Applying	Most learners had difficulty identifying the tool to use for measuring external dimensions	Use of practicals to eplain to the learners how tools are used for different tasks	
6.	Foundations of Pretechnical Studies	Identifying the method of extinguishing fire which the cook used.	Understanding	Most of the learners could not tell which method is appropriate to use for extinguishing the fire in question.	Use of practicals to eplain to the learners the use of different fire extinguishers.	
7.	Communication in Pretechnical Studies	Identifying details on a drawing	Remembering	Most of the learners could not identify the drawing layout features.	Explain to learners how a drawing paper is laid out on the drawing board and the features to include.	
8.	Communication in Pretechnical Studies	Identifying details on a drawing	Remembering	Most of the learners could not identify the drawing layout features.	Explain to learners the importance of a title block on a drawing paper and how it is drawn.	
9.	Communication in Pretechnical Studies	Dimensioning a given drawing	Applying	Most of the learners could not which method is appropriate to use for dimensioning a circle.	Use practical examples to explain to the learners how different features are dimensioned on drawings.	
10.	Communication in Pretechnical Studies	Describing types of Scale	Understanding	Most of the learners could not explain the meaning of a plain scale	Explain clearly the types of scales used in drawing and how each one is used	

Centre code:11205102 Centre Name: NGEGU

Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
11.	Foundations of Pretechnical Studies	Identifying one source of risk associated with working on raised platforms.	Annalysing	Most of the learners could not identify the risk associated with working on raised platforms.	Teach all aspects of risks in all areas where raised platforms are utilized.	
12.	Communication in Pretechnical Studies	Describing pictorial drawings	Understanding	Majority of the learners could not tell the correct description of oblique drawings	Use demonstrations to describe to the leaners how drawings are presented in pictorial.	
13.	Tools and Production	Using Holding tools.	Analysing	Most of the learners could not tell what a vice is used for when carrying out a task.	Use demonstrations to explain to the learners the use of a vice when carrying out a task.	
14.	Tools and Production	Selecting Holding tools	Analysing	Most of the learners could not tell which tool is used for tightening a nut	Use practicals to explain to the learners the use of different tools.	
15.	Entrepreneurship	Ability of a learner to explain the factors considered when locating a production unit		Learners had difficulty identifying and evaluating factors that influence the location of a business enterprise particularly distinguishing between relevant factors and less relevant factors.	"Engage learners in case studies and field investigations of local businesses to analyze factors influencing business location.	
16.	Entrepreneurship	Ability of the learner to explore different sources of business ideas	Analysing	Some learners had difficulty identifying appropriate sources of business ideas and linking personal interests to entrepreneurial opportunities.	Expose learners to various sources of business ideas through case studies practical projects and discussions on entrepreneurship opportunities within their environment.	
17.	Entrepreneurship	Ability of the learner to explore ethical and unethical practices in budgeting	Analysing	Learners are unable to distinguish between ethical and unethical budgeting practices.	Engage learners in budgeting simulations and discussions on transparency accountability and ethical financial management.	

Centre code:11205102 Centre Name: NGEGU						
PRE-TECHNICAL STUDIES ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
18.	Entrepreneurship	Ability of the learner to explore factors considered when selecting a suitable market for goods and services.	Analysing	Learners have challenges identifying key market selection factors for goods and services.	Use of practical examples and market surveys to help learners analyse market size competition and customer preferences.	
19.	Entrepreneurship	Ability of the learner to explain the roles of intermediaries in the distribution of goods and services.	Understanding	Learners confused producers with intermediaries in the distribution chain.	Use illustrations of distribution channels and role-play activities to demonstrate the functions of producers and intermediaries.	
20.	Entrepreneurship	Ability of the learner to explain ways of nurturing talents and abilities for self-development.	Applying	Learners have limited understanding of effective methods of talent identification and development.	Provide learners with opportunities to participate in talent development programmes clubs and mentorship activities.	
21.	Entrepreneurship	Ability of the learner to classify financial institutions in Kenya.	Analysing	Learners experience difficulty classifying banking and non-banking financial institutions.	Use classification charts and research assignments on financial institutions operating in Kenya.	
22.	Entrepreneurship	Ability of the learner to describe ways of government involvement in business.	Understanding	Learners have inadequate knowledge of the government's regulatory role in business operations.	Guide learners through case studies on consumer protection and quality assurance agencies in Kenya.	
23.	Communication in Pretechnical Studies	Identification of data transfer devices	Understanding	Learners are unable to identify transfer devices	Demonstrate use of flash disks Bluetooth Wi-Fi transfer	
24.	Tools and Production	Knowledge of email features (attachments)	Understanding	Learners confuse email functions	Practical lessons on sending emails with attachments	
25.	Tools and Production	Identification of embedded computers	Remembering	Learners lack awareness of embedded systems	Use real-life appliance examples	
26.	Materils for Production	Knowledge of safe e-waste disposal	Evaluating	Learners have a poor understanding of proper disposal methods	Teach 3Rs with real-life case studies	

Centre code:11205102 Centre Name: NGEGU						
PRE-TECHNICAL STUDIES ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
27.	Foundations of Pretechnical Studies	Data protection methods	Applying	Learners have inadequate knowledge of data protection	Demonstrate passwords PINs screen locks	
28.	Tools for Production	Matching software types with functions	Applying	Confusion between software categories	Use comparison charts and examples	
29.	Foundations of Pretechnical Studies	Identification of flammable substances	Understanding	Learners have difficulty classifying hazardous substances	Practical demonstrations on chemical safety	
30.	Communication in Pretechnical Studies	Functions of coding blocks ('Looks')	Understanding	Learners have limited knowledge of visual programming	Teach using Scratch or similar tools	
31.	Communication in Pretechnical Studies	Sketching a try square in oblique projection.	Applying	Most learners had difficulty sketching the try square in oblique projection while some repeated the sketch as it was presented in isometric projection.	Use demonstrations to describe to the leaners how drawings are presented in pictorial.	
32.	Materials for Production	Naming two types of hard wood	Analysing	Most learnerscould not name two types of hardwood	Use realia to explain to learners different materials and where they are found	
33.	Materials for Production	Naming two methods of seasoning	Understanding	Some learners could not name two methods of timber seasoning.	Use demonstrations to explain to learners different methods of timber seasoning.	
34.	Foundations of Pretechnical Studies	Stating ways of preventing fire outbreak	Analysing	Some learners could not name two ways of preventig fire outbreak	Use demonstrations to explain to learners different ways of preventing fire outbreak.	
35.	Communication in Pretechnical Studies	Constructing whose measurements are given	Applying	Some learners could not construct the triangle whose measurements were given	Use models to explain to the learners plane shapes in geometry and how they are constructed.	
36.	Materials for Production	Naming areas where ceramics are used in abuilding	Applying	A few learners could not name areas where ceramic materials are used in a building.	Take learners to construction sites where different materials are in use.	

Centre code:11205102 Centre Name: NGEGU						
PRE-TECHNICAL STUDIES ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
37.	Foundations of Pretechnical Studies	Listing hazards to personal safety	Understanding	Some learners could not list hazards to personal safety.	Take learners to construction sites where personal safety is observed.	
38.	Communication in Pretechnical Studies	Drawing types of line used in technical drawing.	Applying	Some learners could not draw the line used in technical drawing.	Demonstrate to the learners the use different lines in drawing.	
39.	Materials for Production	Identifying items made of metallic materials	Applying	Some learners could not identify items made of metallic materials	Use realia to explain to learners use of different materials.	
40.	Entrepreneurship	Ability of the learner to analyse e-Governemnt services in business.	Analysing	Learners have limited understanding of the role and benefits of e-government platforms in business operations.	Demonstrate the use of e-Citizen services and engage learners in practical activities involving online government services.	
41.	Entrepreneurship	Ability of the learner to analyse services offered by financial institutions in Kenya.	Analysing	Learners have difficulty identifying services provided by commercial banks to customers.	Use real-life scenarios and discussions to explore banking services such as foreign exchange and travellers' cheques/cards.	
42.	Entrepreneurship	Ability of the learner to explain the importance of a business plan in entrepreneurship.	Understanding	Learners are unable to explain the significance of business planning before starting an enterprise.	Engage learners in preparing simple business plans and analysing their importance in business success.	
43.	Entrepreneurship	Ability of the learner to prepare a simple financial statement for a business.	Creating	Learners have challenges classifying assets liabilities and capital when preparing financial statements.	Provide guided practice in preparing simple statements of financial position using worked examples and exercises.	
44.	Entrepreneurship	Ability of the learner to analyse the factors to consider when setting financial goals.	Analysing	Learners have limited understanding of factors influencing personal financial goal setting and budgeting.	Teach budgeting and financial planning skills through practical activities involving personal income and expenditure management.	

Centre code:11205102 Centre Name: NGEGU						
PRE-TECHNICAL STUDIES ANALYSIS REPORT						
Qno.	**STRAND/SKILL/ TASK**	**SKILL TESTED**	**COGNITIVE LEVEL**	**COMMON ERROR/ LEARNING GAP**	**SUGGESTED REMEDY**	**F INDEX**
45.	Materils for Production	Identification of waste disposal methods	Analysing	Learners confuse reuse recycling repair and disposal methods.	Engage learners in recycling projects	
46.	Foundations of Pretechnical Studies	a) Observing safety in the immediate environment. b) Characteristics of computers (diligence/accuracy speed storage	a)Remembering b) Understanding	a) Learners inability to identify basic computer lab safety rules. b)Learners confuse computer characteristics with functions.	a) Reinforce laboratory rules through demonstrations and posters. b)Teach characteristics using practical computer-based activities.	
47.	Tools and Production	Identification of output devices	Understanding	Learners' confuse between input/output devices	Provide regular keyboarding practice and key-identification exercises.	
48.	Foundations of Pretechnical Studies	Knowledge of PPE	Applying	Lack of awareness of protective gear	Demonstrate use of gloves goggles etc.	
49.	Tools and Production	Identification of formatting features	Analysis	Learners fail to distinguish different formatting tools.	Give hands-on word-processing tasks requiring application of formatting features.	
50.	Communication in Pretechnical Studies	a)Identification of variables in a program b)Selection of statements (If…Then)	a) Understanding b) Analysis	a)Learners confuse variables with values or commands. b) Use simple block-based programming activities emphasizing variables.	a) Use simple block-based programming activities emphasizing variables. b) Teach programming logic using flowcharts and visual programming simulations.	

Section 2: Using KJSEA Results to Improve Teaching and Learning

This section provides a simple, practical process to help schools use KJSEA results to improve teaching and learning. The process follows four steps:
1. Review the report;
2. Discuss the results as a school;
3. Take action in the classroom;
4. Reflect on progress.

These steps should be repeated each time new KJSEA results are received.

Phase 1: Review the Report (Within 1–2 weeks of receiving the report)

Before meeting as a school, every member of staff should read the report individually. This preparation will make the Phase 2 discussion more focused and productive. The table below provides suggestions of relevant actions that teachers and heads of institutions can take when reviewing the report.

Action	Teachers	Head of institution
Read the report	Read Level 1 to understand how the school performs across subjects overall. Then read Levels 2, 3, and 4 for the subject(s) you teach.	Read the full report, covering all subjects and all four levels of analysis.
Identify priorities	Note 2–3 content areas, cognitive skill gaps, or areas where learners show persistent difficulty.	Note subjects and skill areas most in need of attention; flag significant gender gaps.
Prepare for the discussion	Write down observations and questions to bring to the Phase 2 meeting.	Schedule the Phase 2 whole-school meeting within one month of receiving the report.

Phase 2: Discuss as a School (Within one month of receiving the report)

The head of institution should facilitate a structured whole-school discussion. It should be noted that the purpose of this meeting is not to identify which subjects or teachers are underperforming. Every subject area, regardless of how it compares to the national average, has room to better support learners.

The discussion should focus on the question: what can we do, together, to strengthen learning for all students in this school? The purpose of this discussion is to agree on a small number of clear, practical actions that the school will implement to improve learning. Teachers of well-performing subjects are equally expected to bring observations and set action points for further improvements.

The discussion uses Levels 1 to 3 as a guide. Level 4 is detailed and subject-specific; it is addressed through individual follow-up work after the meeting (see below).

STEP	Focus	Head of institution	Teachers
1	**Level i: Subject performance and gender**	Present school performance vs. national benchmark across all subjects.	Identify which subjects are a shared school-wide concern.
2	**Level ii: Cognitive skills**	Highlight skill-level patterns across subjects.	Note whether patterns match classroom experience; share observations.
3	**Level iii: Content areas and gender**	Surface content strands with the largest gaps. All subjects are included, not only the lowest-performing ones.	Share subject-specific observations; agree on priorities.
Output	**KPSEA Action plan**	Record agreed school priorities, assigned responsibilities, and a review date.	Commit to subject-level actions for the following term.

Individual follow-up (assigned at the meeting)

Each teacher reviews the Level 4 results for their subject(s) and prepares a short written response addressing two questions:
1. In my subject, where do learners show persistent difficulty, and what might explain this?
2. What specific changes will I make to my teaching to address these difficulties?

Teachers should submit this response to the head of institution within two weeks of the meeting. The head of institution uses these responses to inform classroom observation priorities in Phase 3.

Good practice: Keep the school-level action plan simple. Three to five agreed priorities, each with designated individual(s) responsible for the action, and a target date, is sufficient to give the process structure. *An example action plan template is provided at the end of this guide.

Phase 3: Take Action in the Classroom
(Ongoing throughout the term)

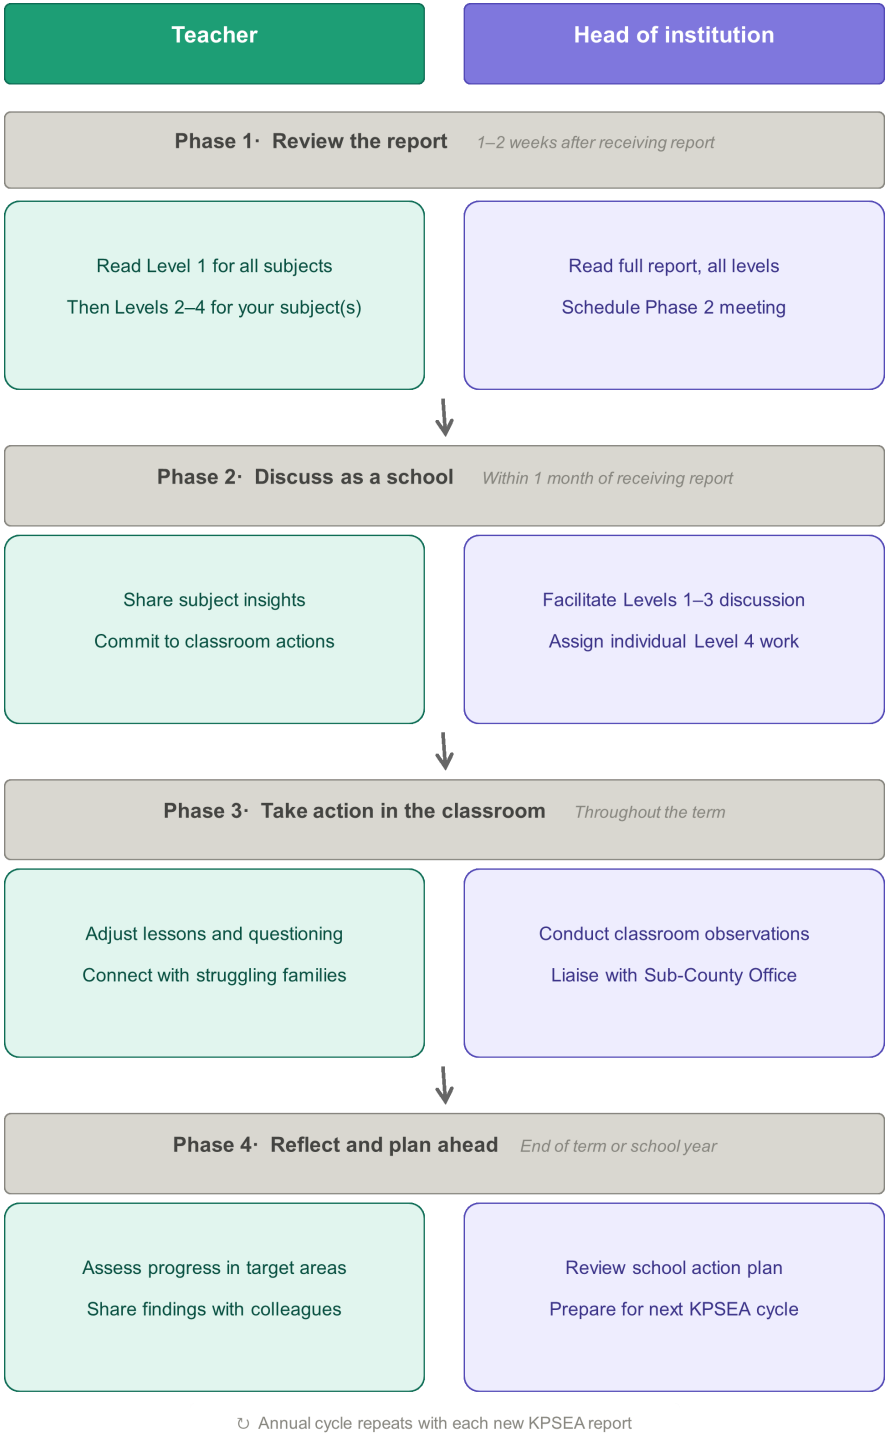

This phase focuses on putting the agreed actions into practice in the classroom. Teachers should make small, practical changes to their teaching, while the head of institution provides support and monitors progress.

Action	Teachers	Head of institution
Adjust lesson planning	Allocate additional time to priority content areas identified in Phases 1 and 2.	Confirm that timetables and resources support identified priorities.
Vary question types	Regularly use recall, explanation, application, and justification tasks in lessons.	During classroom observations, look for a range of question types and active learner engagement.
Support all learners	Use group work and targeted questioning to ensure equal participation by boys and girls.	Encourage teachers to share effective strategies in staff meetings.
Connect with families	Contact parents or guardians of learners who are consistently struggling.	Establish a simple system for tracking family contact.
Engage with education support services	Flag teaching challenges to the head of institution for further support if needed.	Contact the Sub-County Education and TSC Offices to identify available support for pedagogical improvement and in-service training opportunities.

Phase 4:
Reflect and Plan Ahead (End of term or school year)
This phase focuses on reviewing progress and learning from the actions taken. Schools should reflect on what has improved, what challenges remain, and how to adjust their approach for the next term.

Action	Teachers	Head of institution

Check progress	Use short assessments or classroom observation notes to gauge improvement in priority areas.	Review the action plan from Phase 2; note what was achieved and what remains unaddressed.
Share findings	Report back to the head of institution and colleagues.	Facilitate a brief review meeting and document lessons learned.
Prepare for the next cycle	Update notes on learner progress to inform planning for the following term.	Use findings to shape the agenda for the next KPSEA review cycle.

Teacher
Head of institution
Phase 1· Review the report
1–2 weeks after receiving report
Read Level 1 for all subjects
Then Levels 2–4 for your subject(s)
Read full report, all levels
Schedule Phase 2 meeting
Phase 2· Discuss as a school
Within 1 month of receiving report
Share subject insights
Commit to classroom actions
Facilitate Levels 1–3 discussion
Assign individual Level 4 work
Phase 3· Take action in the classroom
Throughout the term
Adjust lessons and questioning
Connect with struggling families
Conduct classroom observations
Liaise with Sub-County Office
Phase 4· Reflect and plan ahead
End of term or school year
Assess progress in target areas
Share findings with colleagues
Review school action plan
Prepare for next KPSEA cycle
↻ Annual cycle repeats with each new KPSEA report

Action Plan Template					
Priority Area	**What is the problem?**	**Action to be taken**	**Who is responsible?**	**When?**	**How will we know it is improving?**
Example: Low performance in English reading	Many learners are below expectation in reading comprehension	Increase reading practice activities in all English lessons	English teachers	This term	Improvement in short class exercises and assessments
